

The power to improve your neighbourhoods

## Understanding Crime in Your Community: Working together towards a solution

An interactive learning and discussion group that highlights the basic principles and techniques used in crime reduction in the community and how they can be applied in neighbourhoods with support from related agencies.

### What's in it for you?

- Recognise warning signs and how to respond
- Use techniques to increase safety in your community and improve your personal safety
- Know the right contacts for crime reduction and ability to use the right reporting procedures

### What's in it for your organisation?

- Improved approaches to crime reduction in the community
- Better approach to crime reduction agencies
- Improved understanding of preventative measures your organisation can take

### By the end of this session you'll be able to...

- Define crime and disorder reduction and methods of reducing crime
- Identify who is involved in crime reduction including organisations and their contact details
- Name five targets for burglars/thieves
- Understand and interpret the effects of crime on the community
- Identify principles of crime reduction and how you can apply these

### What's involved?

An interactive, scenario based workshop with practical exercises, theory, research based learning, group discussion activities and networking opportunities.

- Supporting handouts and reference resources
- Lunch and refreshments included
